PHP-2-SR - Hydraulic set Packer

Model PHP-2-SR Retrievable Hydraulic Packers can be run in single or multiple zone installations. It is recommended for deviated wells where conditions are not suitable for mechanical or wireline set packers. No tubing movement is required or generated to set the packer. Once set, the packer is locked in place by one-piece bi-directional slips and will hold high differential pressures. The packer can be released by either straight pull or right-hand tubing rotation. An equalizing and by-pass feature is incorporated in the release mechanism. They are available for 5" through 9 5/8" casing. Sets securely in any hardness casing, including premium grades Recommended for deviated wells Tubing pressure actuated Three piece packing element system Straight pull or rotational release Bi-directional one-piece slips below the packing
