## Wireline Set Cement Retainers - MWR

Model MWR Wireline Set Sleeve Valve Cement Retainers are used for secondary cementing operations. These drillable retainers set securely in any hardness casing. A ratchet lock ring stores the setting force in the retainer. The one piece packing element and metal back up rings combine for a superior seal. The case hardened, one piece slips virtually eliminate premature setting, yet can be easily drilled out. They are available for 4 1/2" through 20" casing. Sets securely in any hardness casing, including premium grades Ratchet lock rings secure dynamic setting force One piece packing element and rocker action metal back up rings combine for a superior seal Compact, easy running Can be set directly with Baker wireline setting tools Shear studs are Baker style and connect directly to the Baker Adjuster Sub These bridge plugs can be run directly on Baker Setting Sleeves and Adjuster Subs Crossovers are not required
